

The implementation of vehicle video recordings has grown significantly in the past several years. Organizations across different industries have embraced this technology to help mitigate risks, as well as enhancing the overall safety of fleets. Ventra offers different models of Vehicle Video Recorders ideal for various types of vehicles suitable in both commercial, government and private sector.

All Ventra recorders are intuitive and easy to install systems that record detailed information including vivid HD Video, Audio, Speed/Route History, Driver, Vehicle ID, Date and Time.

Benefits

- Protect Driver and Organization
- Video Documentation
- Driver Behavior Analysis
- Safety, Security, Fleet Management
- Risk Mitigation
- Set Vehicle Max Speed Trigger

Any Application | Any Industry | Any Vehicle

Ventra Technology has video safety solutions to fit a wide range of personal or commercial needs. We deliver video solution programs and effective risk measurements for an array of applications and industries. Through our technology and innovative software we can help you protect your fleet or family.

Safety

- Increase Driver Awareness & Compliance
- Help Protect Driver and Company
- Reduce Excessive Wear and Tear
- Manage Vehicle Speed Trigger

Security

- Video Recording in the Event of Incident
- Exonerate Non-Fault Situations
- Track Route History of Vehicle
- Video Proof of Delivery / Service

Management

- Identify, Correct and Reduce Risks
- Improve Vehicle Fuel Efficiency
- Increase Fleet Productivity
- Potentially Lower Insurance Rates
