

EX6-OMIR Expansion Camera Quick Reference Guide

User Guide and Viewing software is included in the CD and can be downloaded at www.ventrainc.com/download

The EX6-OMIR expansion camera for VDR-600 is designed for both indoor and outdoor application. Camera can be installed inside the vehicle to record Driver/passenger, or on the exterior of the vehicle, side mirror or rear of vehicle.

- Determine the EX6-OMIR camera mounting position
- Camera can be mounted on top or bottom by flipping the camera bracket
(The side with the sticker is the bottom of the camera and must face down)
- Connect the 15ft ext. cable connector **COMPLETELY** into the EX6-OMIR cable. (Push it as tightly as possible)

- Connect the earphone plug from the EX6-OMIR into the (**Video Input**) port in the VDR-600 (Push plug completely in so no pin / metal showing)
- The VDR-600 will automatically recognize and power the EX6-OMIR
- System will record both cameras when VDR-600 powers on

NOTE:

Orange wire on the EX6-OMIR does NOT have to be connected to the vehicle unless

1. Video output of the VDR-600 displays the EX6-OMIR permanently instead of the main camera (VDR-600). (Orange wire must be connected to same Ignition fuse/source of the VDR-600) Video output to LCD requires optional EX6-VOC cable
1. Orange wire is connected to the reverse gear so when the vehicle is in reverse gear, the video output display on a monitor temporarily displays the EX6-OMIR image. (Video output to LCD requires optional EX6-VOC cable)

Warning: Install EX6-OMIR only when vehicle is safely parked and Power is OFF.
