

EX6-VOC Video Out Connection Reference Guide

User Guide and Viewing software is included in the CD and can be downloaded at www.ventrainc.com

The EX6-VOC video out connection cable provides a video output signal to LCD monitor to display the video image of the camera(s). If only the VDR-600 main camera is connected, the LCD will display the main camera. If both the main and EX6-OMIR expansion cameras are connected, it will show a Picture in Picture. The VDR-600 will be displayed as the main screen and the EX6-OMIR as a smaller secondary screen in a Picture in Picture (PIP) mode

Connect the EX6-VOC earphone pin jack into the **TRIGGER** input on the VDR-600 camera. Make sure to connect it firmly

Connect a RCA male cable (not included) into the EX6-VOC RCA female connector, then connect the RCA cable into a LCD monitor
